

**REXINO**  
STAINLESS & ALLOYS

## Duplex pipe fitting

**Duplex pipe fittings**, In case you're in the petrochemical, gas or oil commercial ventures, you'll like the requirement for additional solid and erosion safe Pipes, Flanges and other supplies. You'll likewise realize that concentrated stainless steel composites and some of the time titanium are utilized to make this gear, and how pivotal the decision of material is.

For compelling quality, Duplex is made up of 50:50 of ferritic and austenitic steel, while Super Duplex goes one better, with much more imperviousness to setting and anxiety splitting. There are different sorts of both Duplex and Super Duplex applications, from F55 to F53 and UNS S32750/60, as plot beneath. These sorts of stainless steel were created in Sweden nearly seven decades prior.
